

EMPHASIZING ORGANIZATION,
DURABILITY AND A SUPERIOR
STORE EXPERIENCE.

KEEPING DISPLAYS
LOOKING FRESH.

SPACE DRIVER® II

A practical, easy solution to organize bottled products –

Declutter and protect inventory with SpaceDriver® II pusher systems from Retail Space Solutions.

Due to their shape and weight, bottled products present several retail challenges. SpaceDriver II and its patented controlled-pusher movement – which automatically regulates the speed and force at which products slide forward – is the solution. **Products remain front-faced at all times, allowing for easy selection without the risk of product damage.**

SpaceDriver II pusher systems:

- Create attractive, front-facing displays
- Require minimal conditioning
- Adjust to fit multiple shapes and sizes
- Reduce risk of false out-of-stocks due to misplaced products

SpaceDriver II pusher systems keep bottled displays in order, **and that drives higher sales.**

Why install Retail Space Solutions SpaceDriver II pusher systems?

SECURE
fragile products

IMPROVED
product presentation

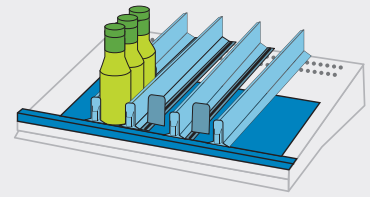

FLEXIBLE
merchandising

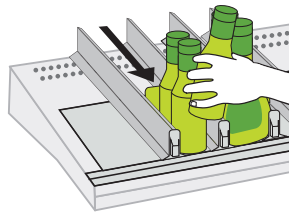

BETTER
shopper
experience

SPACE DRIVER® II

Keeping bottled products in full view, front of shelf, ready to go

Controlled pusher for smooth movement of products

The patented damper design automatically regulates the speed and force of the pusher.

Lens-free design provides greater product visibility

Shoppers can quickly and easily identify and grab the products they want to examine and buy.

Modular platform and adjustable divider walls

Each pusher is independently adjustable, allowing multiple products of varying shapes and sizes to be displayed next to each other on the same shelf.

Durable construction ensures longevity

Long-lasting pusher systems are made with sturdy, durable ABS plastic.
