

A FOCUS ON FLAWLESS INSTALLATION & A QUALITY CUSTOMER EXPERIENCE.

**CONVENIENCE
IN PLAIN SIGHT.**

An innovative solution to keeping products front and center –

Introducing SimpliStock™ Center Store modular pusher display systems from Retail Space Solutions.

SimpliStock™ shelf pusher systems keep products front-faced and uncluttered, creating an intuitive shopping experience. The patent-pending SwiftHook™ connects easily and can be quickly repositioned for any planogram changes. The lightweight, durable tray adjusts to fit any size product. The centered pusher paddle keeps products moving forward smoothly without twisting or tearing, resulting in **clear displays** and **boosting sales**.

SimpliStock™ Center Store pusher systems:

- Adjust to fit any product packaging
- Reduce time needed from staff to tidy shelves
- Work with existing infrastructure
- Ensure visibility and boost sales by front-facing products

Center Store pusher systems are simple to install and **create orderly – and effective – product displays.**

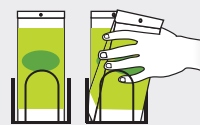

Why install Retail Space Solutions SimpliStock pusher systems?

IMPROVED
product presentation

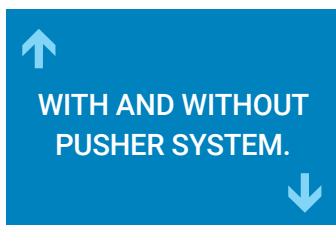

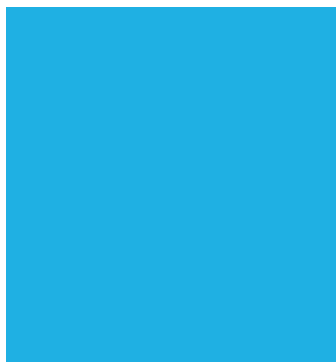

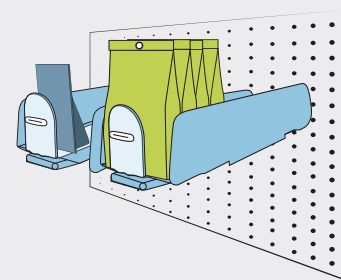

INCREASED
facings

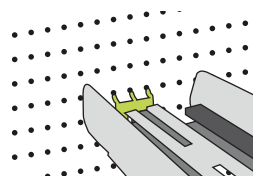

REDUCED
conditioning

BETTER
shopper experience

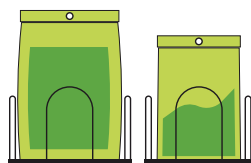

Effortless installation and versatile design

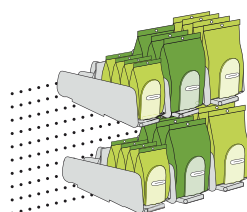

SwiftHook™ securely attaches to gondola

Installation of the patent-pending SwiftHook™ is intuitive and secure. Metal hook attaches easily to existing pegboards or slatwalls and allows for simple repositioning during planogram changes.

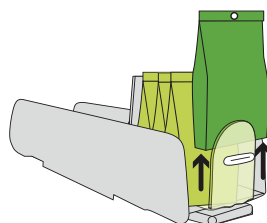

Front-facing products create new store feel every day

Pusher seamlessly glides products forward to ensure constant visibility and organization, keeping them neat. No twisting or ripped peg holes in bags.

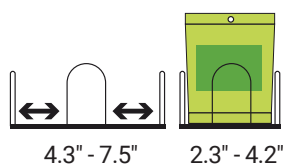

Increased product facings

Lightweight, sturdy tray allows products to sit above the gondola, creating an additional row of facings at the top.

Upward pull makes reaching for low products easier

With SimpliStock™ installed, customers can grab products by simply pulling them upward – without having to bend down far to reach them.

Adjustable width tray accommodates various package sizes

Width of flexible tray adjusts smoothly and easily by hand. Two sizes – narrow and wide – accommodate the majority of standard goods.
