

ATTRACTIVE AND ORGANIZED DISPLAYS ARE KEY TO A POSITIVE CONSUMER EXPERIENCE.

## PUSHER SYSTEMS PUSH FROZEN SALES.

Built to withstand the rigors of the freezer and designed to move merchandise –

### Introducing SpaceGrid® HiGlide™ premium pusher display systems from Retail Space Solutions.

Countless varieties of product packaging and routine customer shopping take a toll on frozen displays. Retail Space Solutions designs and builds premium pusher systems engineered to meet those challenges and increase sales.

Our durable pusher system delivers results:

- Better presentation drives quick buying decisions
- More facings through SpaceGrid's innovative design
- Faster restocking means less open-door time

Optimized merchandising space, increased sales, reduction in labor costs – **Retail Space Solutions helps build the bottom line.**

Why install Retail Space Solutions HiGlide pusher systems?

**IMPROVED**  
product presentation

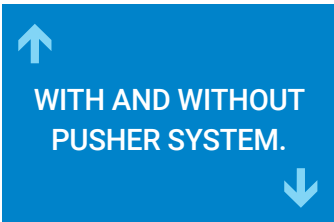

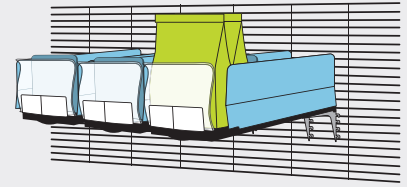

**INCREASED**  
facings

**REDUCED**  
conditioning &  
restocking time

**BETTER**  
shopper  
experience

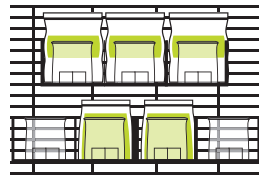

## Innovative organization systems with maximum flexibility

### Front-faced products create new store feel every day

Pusher brings product to the front to create the feel of a new store opening every day, making purchasing decisions easier for shoppers

### Grid mounting system increases product facings

SpaceGrid® provides efficient use of vertical space & tighter pack out horizontally for more facings than shelves

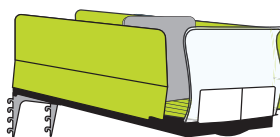

### Pull-out trays for easy restocking

Reduce restocking time by simply lifting the tray, pulling it forward and quickly restocking

### High divider walls manage tall or bagged items

4"-high walls ensure all product can be pushed to the front, including heavy, tall or floppy packages, like bags of frozen vegetables or fruit

### Durable components for long-term performance

Platform, pusher & trays built from ABS plastic for durability, while polycarbonate lenses keeps product visible & secured in the pusher
